

Espresso Originations

New Customers Online Instantly.

Espresso Enterprise is a configurable multi-channel product origination and workflow platform that provides a simplified, paperless account opening and lending experience. The platform offers tailored forms for multiple account opening scenarios, including transactional accounts and other banking products. Complete end-to-end customer onboarding and product origination for loans and credit applications is integrated with electronic identity verification and credit scoring to maximise efficiency and reduce processing errors. Espresso Enterprise will also allow your institution to automate business and decisioning processes for mortgage origination, from application capture to customer acceptance and final approval.

Key Features:

- Electronic Identity Verification
- Online Credit Checking
- End-to-End Processing
